Simple Asset & Supply Tracking System

Database Tables

Asset Management

Simple tracking of company assets and who is using them.

- **Assets** - List of all company assets (computers, furniture, equipment, etc.)
- **Asset_Types** - Categories of assets (e.g., "Laptop," "Chair," "Monitor")
- **Accessories** - List of accessory items that can be tracked
- **Asset_Images** - Photos of assets
- **Asset_Comments** - Notes and comments about assets with optional photos

People & Places

Track who has what and where things are located.

- **Employees** - List of all employees
- **Departments** - Company departments
- **Branches** - Company branch locations
- **Asset_Assignments** - Track who has which asset (current and history)

Simple Tracking

Basic records of what happens to assets.

- **Incident_Reports** - Simple log when something happens to an asset
- **Asset_Disposal** - Record when asset is retired/lost/disposed

Supply Management

Track office supplies and who requests them.

- **Supplies** - List of all office supplies
- **Categories** - Groups supplies (e.g., "Pens," "Paper," "Printer Supplies")
- **Inventory_Stock** - How many supplies are in stock
- **Stock_Locations** - Where supplies are stored

- **Supply_Requests** - Track who requests supplies and how often
- **Stock_Transactions** - Record when supplies come IN or go OUT

Processes

1. Add New Asset

1. Create record in **Assets** table with basic info
2. Upload photo if available
3. Set status as "Available"

2. Assign Asset to Employee

1. Select asset and employee
2. Select branch where asset will be used
3. Create record in **Asset_Assignments**
4. Update asset status to "Assigned"

3. Transfer Asset to Different Employee

1. Close current assignment (add return date)
2. Create new assignment for new employee
3. System keeps history of all assignments

4. Report Issue with Asset

1. Create simple report in **Incident_Reports**
2. Describe what happened
3. Note what was done about it

5. Retire/Dispose Asset

1. Create record in **Asset_Disposal**
2. Write reason for disposal
3. Set asset status to "Disposed" or "Lost"

4. Close any open assignment

6. Request Supplies

1. Employee requests supplies
2. Create record in **Supply_Requests**
3. System tracks who requests, what they request, and how often

7. Give Out Supplies

1. Record transaction in **Stock_Transactions** as "OUT"
2. Reduce stock count in **Inventory_Stock**
3. Note reason: Dispensed, Lost, or Damaged

8. Restock Supplies

1. Record transaction in **Stock_Transactions** as "IN"
2. Increase stock count in **Inventory_Stock**

Data Dictionary

I. AssetManagement

Asset

Field Name	Data Type	Notes	Description
Asset_ID	INT	Primary Key	Unique ID for each asset
Asset_Tag	VARCHAR(50)	Unique, Required	Company's asset tag/sticker number
Asset_Name	VARCHAR(150)	Required	Name of the asset (e.g., "Dell Laptop")
Description	TEXT	Required	Detailed description of the asset
Serial_Number	VARCHAR(100)	Optional	Manufacturer's serial number (if available)
Asset_Type_ID	INT	FK -> Asset_Types	Type/category of asset
Purchase_Date	DATE	Required	When asset was acquired
Cost	DECIMAL(10,2)	Optional	How much it cost (if known)
Status	VARCHAR(50)	Required	Current status: Available, Assigned, In Repair, Disposed, Lost
Current_Branch_ID	INT	FK -> Branches	Which branch has this asset
Current_Employee_ID	INT	FK -> Employees	Who currently has this asset (if assigned)

Asset_Types

Field Name	Data Type	Notes	Description
Type_ID	INT	Primary Key	Unique ID
Type_Name	VARCHAR(100)	Unique, Required	Category name (e.g., "Laptop", "Chair")

Accessories

Field Name	Data Type	Notes	Description
Accessory_ID	INT	Primary Key	Unique ID
Accessory_Name	VARCHAR(150)	Required	Name (e.g., "Mouse", "Keyboard")
Description	TEXT		Details about the accessory

Asset_Images

Field Name	Data Type	Notes	Description
Image_ID	INT	Primary Key	Unique ID
Asset_ID	INT	FK -> Assets	Which asset this photo belongs to
Image_Path	VARCHAR(255)	Required	Where the photo is stored
Upload_Date	DATETIME	Required	When photo was added
Uploaded_By	INT	FK -> Employees	Who uploaded the photo

Asset_Comments

Field Name	Data Type	Notes	Description
Comment_ID	INT	Primary Key	Unique ID
Asset_ID	INT	FK -> Assets	Which asset
Comment_Text	TEXT	Required	The comment/note
Comment_Date	DATETIME	Required	When comment was made
Created_By	INT	FK -> Employees	Who made the comment
Photo_Path	VARCHAR(255)	Optional	Attached photo (if any)

II. People & Places

Employees

Field Name	Data Type	Notes	Description
Employee_ID	INT	Primary Key	Unique ID
First_Name	VARCHAR(50)	Required	First name
Last_Name	VARCHAR(50)	Required	Last name
Email	VARCHAR(100)	Unique, Required	Email address
Department_ID	INT	FK -> Departments	Which department
Branch_ID	INT	FK -> Branches	Which branch
Status	VARCHAR(20)	Required	Active or Inactive

Departments

Field Name	Data Type	Notes	Description
Dept_ID	INT	Primary Key	Unique ID
Dept_Name	VARCHAR(100)	Unique, Required	Department name

Branches

Field Name	Data Type	Notes	Description
Branch_ID	INT	Primary Key	Unique ID
Branch_Name	VARCHAR(100)	Unique, Required	Branch name
Address	TEXT		Branch address

Asset_Assignments

Field Name	Data Type	Notes	Description
Assignment_ID	INT	Primary Key	Unique ID
Asset_ID	INT	FK -> Assets	Which asset
Employee_ID	INT	FK -> Employees	Who has it
Branch_ID	INT	FK -> Branches, Required	Which branch
Assignment_Date	DATE	Required	When assigned
Return_Date	DATE	Optional	When returned (empty if still assigned)
Notes	TEXT		Any notes about the assignment

Note: System automatically tracks assignment history - you can see where an asset was assigned before by looking at all records for that Asset_ID ordered by date.

III. Simple Asset

Tracking

Incident_Reports

Field Name	Data Type	Notes	Description
Report_ID	INT	Primary Key	Unique ID
Asset_ID	INT	FK -> Assets	Which asset
Report_Date	DATETIME	Required	When reported
Reported_By	INT	FK -> Employees	Who reported it
What_Happened	TEXT	Required	Description of what happened
What_Was_Done	TEXT		What action was taken
Cost	DECIMAL(10,2)	Optional	Cost if any repair/service

Asset_Disposal

Field Name	Data Type	Notes	Description
Disposal_ID	INT	Primary Key	Unique ID
Asset_ID	INT	FK -> Assets	Which asset
Disposal_Date	DATE	Required	When disposed
Disposal_Type	VARCHAR(50)	Required	Scrapped, Sold, Donated, or Lost
Reason	TEXT	Required	Why it was disposed

VI Supply Management

Supplies

Field Name	Data Type	Notes	Description
Supply_ID	INT	Primary Key	Unique ID
Supply_Name	VARCHAR(150)	Unique, Required	Name of supply item
Category_ID	INT	FK -> Categories	What category
Unit_of_Measure	VARCHAR(20)	Required	How it's counted (Box, Each, Pack, etc.)

Categories

Field Name	Data Type	Notes	Description
Cat_ID	INT	Primary Key	Unique ID
Cat_Name	VARCHAR(100)	Unique, Required	Category name

Inventory_Stock

Field Name	Data Type	Notes	Description
Stock_ID	INT	Primary Key	Unique ID
Supply_ID	INT	FK -> Supplies	Which supply
Stock_Location_ID	INT	FK -> Stock_Locations	Where stored
Current_Count	INT	Required, Default: 0	How many in stock now
Reorder_Level	INT	Optional	Low stock alert level (if set)
Unit_Cost	DECIMAL(10,2)	Optional	Cost per unit (if known)

Stock_Locations

Field Name	Data Type	Notes	Description
Location_ID	INT	Primary Key	Unique ID
Location_Name	VARCHAR(100)	Unique, Required	Name of storage area
Branch_ID	INT	FK -> Branches	Which branch

Supply_Requests

Field Name	Data Type	Notes	Description
Request_ID	INT	Primary Key	Unique ID
Employee_ID	INT	FK -> Employees	Who is requesting
Department_ID	INT	FK -> Departments	Which department
Request_Date	DATETIME	Required	When requested
Status	VARCHAR(20)	Required	Pending, Approved, Fulfilled, Rejected

Supply_Request_Items

Field Name	Data Type	Notes	Description
Item_ID	INT	Primary Key	Unique ID
Request_ID	INT	FK -> Supply_Requests	Which request
Supply_ID	INT	FK -> Supplies	What supply
Quantity_Requested	INT	Required	How many requested
Notes	TEXT		Any special notes

Stock_Transactions

Field Name	Data Type	Notes	Description
Transaction_ID	INT	Primary Key	Unique ID
Supply_ID	INT	FK -> Supplies	Which supply
Stock_Location_ID	INT	FK -> Stock_Locations	Which storage location
Transaction_Type	VARCHAR(10)	Required	"IN" or "OUT"
Reason	VARCHAR(50)	Required for OUT	If OUT: Dispensed, Lost, or Damaged
Quantity	INT	Required	How many
Transaction_Date	DATETIME	Required	When
Employee_ID	INT	FK -> Employees	Who (for OUT transactions)
Department_ID	INT	FK -> Departments	Which department (for OUT)
Request_ID	INT	FK -> Supply_Requests	Link to request (if from request)
Receipt_Path	VARCHAR(255)	Optional	Receipt/proof (for IN)
Notes	TEXT		Any notes

Key Features

- **Simple Asset Tracking** - Know what you have, who has it, and where it is
- **Assignment History** - See complete history of who had an asset
- **Photos** - Attach photos to assets and comments
- **Branch Operations** - Track which branch has what
- **Supply Requests** - Track who requests supplies and how often
- **Lost Item Tracking** - Track items that frequently go missing
- **IN/OUT Transactions** - Simple restock and dispense tracking
- **No Complex Procurement** - Just basic tracking, no purchase orders or approvals
- **Receipt Storage** - Keep receipts for supplies purchased

This is a **simple tracking system** focused on:

- Who has what asset
- Where assets are located
- Who requests supplies and how often
- Basic stock levels
